Education

Michigan State University, East Lansing, USA 2024.08 - Present
Doctor of Computer Science
Advisor: Prof. Sijia Liu @ OPTML Lab

Huazhong University of Science and Technology, Wuhan, China 2020.09 - 2024.06
Bachelor of Engineering
Outstanding Graduate
GPA: 3.96/4.0

Industrial Experience

ByteDance, Full-time Summer Internship, San Jose, USA 2025.05 – 2025.08
Research Scientist Intern, Mentor: Jian Du
Project: Multi-agent System and Model Context Protocol

- Improve multi-agent reasoning with reinforcement learning
- Design counterfactual rewards to enhance collaboration in multi-agent systems
- Defined privacy issues in Model Context Protocol
- Proposed *Log-to-Leak*, an attack framework for agent systems
- Research outcome: Paper submitted to **ICLR'26**

Research Project Highlights

- **Post-training Knowledge Editing and Alignment for LLMs and Diffusion Models**
My research focuses on developing methods to mitigate the influence of undesired knowledge in foundation models, particularly during the post-training stage of LLMs [NeurIPS'25a], [EMNLP'25] and diffusion models [ICLR'24], [NeurIPS'24a], [NeurIPS'24b]. Through these efforts, I aim to enhance the trustworthiness, robustness, and safety of next-generation AI systems.
- **Bi-level and Smooth Optimization for LLMs and Diffusion Models**
My research leverages bi-level optimization to improve both the training and inference of LLMs and diffusion models, enhancing their robustness and interpretability [ECCV'24], [NeurIPS'25b], and explores smooth optimization to strengthen the safety and reliability of LLMs [ICML'25].
- **Efficient Inference and Training for Reasoning Models**
I investigate optimized test-time computation to enhance reasoning capability while mitigating over- and under-thinking issues [arXiv'25a], and design dataset condensation techniques to improve the efficiency and scalability of reasoning model training [arXiv'25b].

Publications

I have published more than ten papers in top-tier machine learning and computer vision venues (*e.g.*, NeurIPS, ICML, ICLR, ECCV, EMNLP), with **five** of them as first author. As of September 27, 2025, my research has garnered **444** citations on Google Scholar.
