Education

Michigan State University, East Lansing, USA   2024.08 - Present
Doctor of Computer Science
Advisor: Prof. Sijia Liu @ OPTML Lab

Huazhong University of Science and Technology, Wuhan, China   2020.09 - 2024.06
Bachelor of Engineering
Outstanding Graduate
GPA: 3.96/4.0

Industry Experience

ByteDance Seed, Research Scientist Intern, San Jose, USA   2025.12 - Present
- **Reinforcement Pre-training (RPT) for Vision-Language Models**
  - Reframed next-token prediction into *verifiable rewards* for reinforcement learning.
  - Improved rollout efficiency by leveraging high-entropy data for exploration.
  - Achieved 8% gains with RPT over pretraining, and retained them during post-training.

TikTok, Research Scientist Intern, San Jose, USA   2025.05 - 2025.08
- **Reinforcement Learning for Multi-Agent Systems**
  - Identified reward imbalance issues in multi-agent reinforcement learning.
  - Proposed a *counterfactual reward* mechanism to fairly evaluate each agent's contribution.
  - Achieved a 10% performance improvement on math reasoning tasks over state-of-the-art baselines.
- **Log-to-Leak Attack on Model Context Protocol (MCP)**
  - Discovered security issues in MCP that may lead to leakage of user–agent interaction logs.
  - Developed *Log-to-Leak*, a prompt injection attack framework for MCP.
  - Demonstrated 100% leakage success under real-world agent settings.
- **Research Outcome:** Paper submitted to **ICLR 2026**.

Research Project Highlights

• Post-training Knowledge Editing and Alignment for LLMs and Diffusion Models
My research focuses on developing methods to mitigate the influence of undesired knowledge in foundation models, particularly during the post-training stage of LLMs **[NeurIPS'25a]**, **[EMNLP'25]** and diffusion models **[ICLR'24]**, **[NeurIPS'24a]**, **[NeurIPS'24b]**. Through these efforts, I aim to enhance the trustworthiness, robustness, and safety of next-generation AI systems.

• Bi-level and Smooth Optimization for LLMs and Diffusion Models
My research leverages bi-level optimization to improve both the training and inference of LLMs and diffusion models, enhancing their robustness and interpretability **[ECCV'24]**, and explores smooth optimization to strengthen the safety and reliability of LLMs **[ICML'25]**.

• Efficient Inference and Training for Reasoning Models
I investigate optimized test-time computation to enhance reasoning capability while mitigating over- and under-thinking issues **[ICLR'26a]**, **[NeurIPS'25b]**, and design dataset condensation techniques to improve the efficiency and scalability of reasoning model training **[arXiv'25a]**.

Publications

I have published more than ten papers in top-tier machine learning and computer vision venues (*e.g.*, NeurIPS, ICML, ICLR, ECCV, EMNLP), with **six** of them as first author. As of February 16, 2026, my research has garnered **691** citations on Google Scholar.

First-Authored Publications (* indicates equal contribution)

[ICLR'24]   <u>C. Fan</u>, J. Liu, Y. Zhang, D. Wei, E. Wong, S. Liu, *"SalUn: Empowering machine unlearning via gradient-based weight saliency in both image classification and generation."* (**Spotlight, acceptance rate 5%; 200+ citations**; IBM Pat Goldberg Best Paper Award Finalist)

[ECCV'24]   <u>C. Fan</u>, J. Liu, A. Hero, S. Liu, *"Challenging forgets: Unveiling the worst-case forget sets in machine unlearning."* (Travel Grant)

Academic Services

- **Workshop Student Co-Organizer:** New Frontiers in Adversarial ML [NeurIPS'24]

- **Reviewer:** ICLR'25-26, ICML'25, NeurIPS'25, AISTATS'25

Grant/Funding Experience

Cisco Research Award ($75,000)   2025 – 2026
- Topic: "Vision–Language–Action Model Fine-Tuning through Modularity and Spectral Optimization"
- PI: Dr. Sijia Liu
- Role: Co-Proposal Writer

Honors

Graduate Travel Fellowship, Michigan State University   2024
Graduate Travel Fellowship, Michigan State University   2025
IBM Pat Goldberg Best Paper Award Finalist   2025

Mentees

Yicheng Lang(Undergraduate@XJTU, PhD@MSU) - [ICLR'26b]   2025.05 - 2025.09
